Documentation

Working drafts for the Master of Engineering project by **Manikandan Sankaranarayanan** (Computer Science and Engineering, S Veersamy Chettiya College of Engineering). Every `.md` file has a matching `.pdf` beside it, produced by `scripts/md_to_pdf.py` (the IEEE abstract uses `scripts/abstract_to_pdf.py`).

Author profile for papers and forms: `references/personal-info.md`.

Start here

Read	For
thesis/technologies.md	Plain-language explanation of every technology used (hashing, Merkle trees, blockchain, Solidity, Hardhat, agents, Ollama)
TESTING.md	How to run and understand every test, and how to try to break the system by hand
notes/progress-report.md	What has been done, current numbers, what remains
study/concepts-study-guide.md	Every concept with a definition, where it appears in the code, verified links and a self-check question
anna-university/format-guide.md	Anna University M.E. report format rules, sources, and what to confirm with your coordinator
report/Phase1-Report.docx	The Phase I report in Anna University format (Word)

All documents

Folder	File	Content
proposal	auditable-agents.md	Problem, approach, deliverables, success criteria, plan
proposal	decisions.md	Locked choices and research questions
literature	audit-trail-notes.md	Reading notes, recommended base paper, gap
methodology	architecture.md	Layers, data flow, what each check catches
methodology	evaluation-plan.md	Threat model and the four experiments
thesis	ieee-abstract.md	IEEE conference abstract (also a one-page PDF)
thesis	extended-abstract.md	Two-page extended abstract
thesis	technologies.md	Technology explainer
notes	month-1-backlog.md	Task list
notes	progress-report.md	Progress and status
notes	agents-and-skills.md	Agents and skills used, and those prepared for reuse
study	concepts-study-guide.md	Concept study guide
anna-university	format-guide.md	Format rules
anna-university	checklist.md	Submission checklist
report	phase1-report.md	Phase I report source (Markdown); built into Word and a PDF preview

Rebuild all PDFs:

```
python scripts/abstract_to_pdf.py docs/thesis/ieee-abstract.md
python scripts/md_to_pdf.py docs/TESTING.md docs/thesis/*.md docs/literature/audit-trail-not
es.md docs/methodology/*.md docs/proposal/*.md docs/notes/progress-report.md docs/notes/mont
h-1-backlog.md
```

(`ieee-abstract.md` is rendered by the abstract script; running the general script over it as well would overwrite the one-page PDF, so build it last.)
